Quality
Craftsmanship &
Complete Service

TANK CONSTRUCTION

With 20 years of tank construction experience, Strobel Construction can meet all of your tank construction needs. We can assist you in determining the most effective and practical yet innovative design for your individual project. We will construct your storage tanks according to all applicable standards using only quality grade materials.

"Quality Craftsmanship and Complete Service" is not only Strobel Construction's motto, but also our commitment to you. With over 20 years in the construction industry, our experienced supervisors and qualified crews are equipped to handle your next project. Our complete services include facility design, earthwork, concrete, buildings, liners, tank construction, relocation, inspection and repair, mechanical and steel structures. For more information, call 1-800-962-8110.

EXCAVATION & EARTHWORK

Strobel Construction can complete all excavation and earthwork necessary for your project:

- Land clearing
- Leveling
- Earth moving
- Roads
- Grading
- Backhoe
- Earthen Dike Construction

LINER INSTALLATION

Whether you are considering new liner installation or upgrading an existing site, we can provide up-to-date, knowledgeable information on the regulations regarding your application. We can install various liner materials, inspection pipes and monitoring systems for the following as well as various other applications.

- Secondary Containment Systems
- Lagoons
- Landfills

CONCRETE

Our specialties at Strobel Construction include:

- Concrete sidewalks
- Driveways
- Footings
- Foundations
- Walls
- Watertight Containment

We use various types of forming materials to suit your specific needs. Our experienced concrete supervisors and qualified formers and finishers can ensure quality craftsmanship and complete service on every detail of your concrete construction.

TANK INSPECTION & REPAIR

We offer a complete onsite inspection of your above ground steel storage tanks in accordance with the general applicable standards. We offer various methods of inspection including:

- Visual
- Vacuum Testing
- Ultrasonic
- Die Penetration
- Radiography

We assess the current condition of your tanks based on the field data retrieved and provide a clear and concise inspection report with recommendations to ensure a sound tank. If repairs are necessary, you can be assured they will be performed correctly and promptly.

TANK RELOCATION

Strobel Construction can perform both large and small tank relocation. We offer structural tank relocation services for large storage tanks. Our hydraulic small tank mover is a quick and efficient method to relocate tanks up to 12' in diameter and 30' in height.

PLUMBING, PIPING & STEEL STRUCTURES

In the most practical and efficient manner, we will design your load out facilities to provide you with a system designed for your individual application. It is our goal to increase productivity and decrease your labor costs. Mild steel, stainless steel, copper and driscoe pipe are some of the materials we offer for mechanical applications.

BUILDINGS

Top quality, well constructed metal or wooden buildings are offered with a wide selection of options and colors. Strobel Construction can economically accomplish whatever your building construction needs may be, from the smallest to largest in structures for all applications.

"How refreshing it is to see people work hard and fast. Project organization was handled in a very professional manner and every effort was made to keep on schedule. The quality of Strobel Construction's work is outstanding. Various suppliers have visited our facility and walked away in awe."

BIEGERT ENTERPRISES, INC.
Jeff Biegert, President

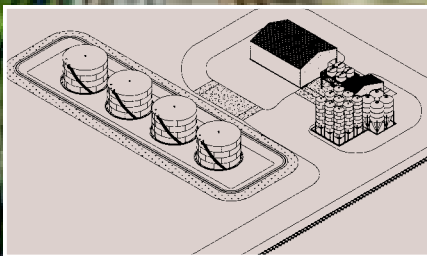

"Dependable, organized, focused and a genuine pleasure to work with...Strobel Construction was very flexible to our needs and performing the best job possible was their utmost concern."
